EXPERIENCE

Shift Digital, Software and Delivery Team

Birmingham, MI (Remote)

Data Analyst II

Jun 2025 - Present

- Lead generative AI initiatives and mentor analysts, driving digital marketing optimization across 14 automotive clients
- Delivered 180+ data solutions at a 96% completion rate with a 5-day median cycle time, spanning billing, enrollment, and campaign analytics workflows
- Architected end-to-end internal analytics platform used by 24-person data team: built ETL pipeline ingesting Azure DevOps work items into Databricks and shipped Lakeview dashboard tracking team delivery metrics and client allocation
- Engineered end-to-end Finance Data Lake in Databricks: architected ETL pipelines, NetSuite ID mapping, and Lakeview dashboards consolidating billing data across the organization
- Led Salesforce CPQ rollout impact assessment, developing analytical dashboards and presenting findings to finance leadership to guide company-wide system migration

Shift Digital, Software and Delivery Team

Birmingham, MI (Remote)

Data Analyst I

Nov 2021 - May 2023

- Owned analytics delivery for 23 brands, executing 186 production tasks with 99% completion and 3-day median turnaround
- Improved data accuracy by 25% across 10+ enterprise projects by optimizing big data ETL processes
- Optimized operations for 12 high-value clients and saved 15 hours weekly by automating billing data processing
- Applied SQL and Python within PySpark to transform raw data into cleaned, analysis-ready datasets
- Championed technical proposals aligned with project scope and business goals, achieving 100% customer approval rate

Array of Engineers

Grand Rapids, MI

Computer Engineer

Jul 2020 - Nov 2021

- Verified Airbus A350 avionics software using DOORS and Ansys SCADE, ensuring aerospace industry compliance
- Improved user experience by optimizing web app features with AngularJS, increasing client retention by 25%
- Introduced modular workflows for software testing, standardizing processes and achieving 98% on-time delivery

PROJECTS

AI Chatbot for Foundation Model Benchmarking: FMBench Assistant

Apr 2025

- Proactively developed production-ready, serverless conversational assistant to help users explore FMBench using NLP
- Designed a modular RAG pipeline using LangGraph, FAISS, and Amazon Bedrock for embeddings and LLM generation
- Deployed FastAPI backend with thread-based memory on AWS Lambda with API Gateway integration and Streamlit frontend enabling real-time, context-aware conversations
- Integrated Bedrock Guardrails to ensure safe, accurate, and compliant responses across multi-turn dialogues

Topics and Sentiments in Reddit Data

Aug 2023 - Dec 2024

- Analyzed 1+ billion Reddit posts and comments over 14 months using NLP and ML, uncovering U.S. state-level trends
- Refined 109 GB of data using Spark on AWS SageMaker, achieving a 95% reduction for efficient large-scale analysis

URL: [U.S. State Sentiments on Reddit](#)

EDUCATION

Georgetown University (GU)

Master of Science in Data Science and Analytics

Washington, D.C.

Aug 2023 - May 2025

Grand Valley State University (GVSU)

Bachelor of Science in Computer Science

Grand Rapids, MI

Aug 2015 - May 2020

ADDITIONAL SKILLS

Programming: Python, SQL, R, Java, C++

Data Visualization: Tableau, Plotly, Seaborn

NLP: spaCy, Hugging Face Transformers, BERT

Tools: Docker, Flask, Quarto, CI/CD pipelines

Machine Learning: Scikit-learn, TensorFlow, PyTorch, XGBoost

Big Data & Cloud: Apache Spark, Databricks, AWS Sagemaker

Databases: MySQL, PostgreSQL, MongoDB, Snowflake

Statistical Methods: A/B Testing, Regression, Bayesian Analysis
