

ISFAR BASET

Reston, VA 20190 • (616) 469-7899 • isfar.baset@gmail.com • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

Data scientist and analytics engineer leading data and AI initiatives across Databricks, Azure, and AWS, turning complex data into systems people rely on. Adept at mentoring analysts and working with finance leaders to ground big decisions in evidence

EXPERIENCE

Shift Digital, Software and Delivery Team

Birmingham, MI (Remote)

Data Analyst II

Jun 2025 – Present

- Lead the team's generative AI adoption and mentor analysts, building internal tools that save an estimated 10+ hours weekly
- Engineered a Databricks finance data lake on a medallion architecture, replacing Power BI billing reporting and cutting month-end turnaround by 40%
- Architected a Databricks pipeline and Lakeview dashboard from Azure DevOps tickets, trusted department-wide for client allocation auditing
- Paired the dashboard with an LLM-generated monthly summary, used by the full 24-person team
- Drove the Salesforce CPQ rollout assessment, presenting analysis to finance leaders that guided a company-wide system migration

Georgetown University

Washington, D.C.

Graduate Teaching Assistant

Aug 2023 – May 2025

- Lead TA for Applied Generative AI (TA Award winner) and TA for Big Data & Cloud Computing
- Guided students through hands-on labs and projects in LLMs, RAG, Spark, and cloud computing

Shift Digital, Software and Delivery Team

Birmingham, MI (Remote)

Data Analyst I

Nov 2021 – May 2023

- Owned analytics delivery for 23 brands, completing 186 production tasks at 99% with a 3-day median turnaround
- Reengineered big-data ETL pipelines to improve data accuracy by 25% across 10+ enterprise projects
- Automated billing data processing for 12 clients, cutting 15 hours of manual work each week
- Developed PySpark and SQL transformations turning raw client data into clean, analysis-ready datasets
- Wrote and pitched technical proposals that won client sign-off

Array of Engineers

Grand Rapids, MI

Computer Engineer

Jul 2020 – Nov 2021

- Verified Airbus A350 avionics software with DOORS and Ansys SCADE against aerospace safety standards
- Standardized the software testing workflow, hitting 98% on-time delivery

PROJECTS

AI Chatbot for Foundation Model Benchmarking: FMBench Assistant

Apr 2025

- Built a serverless conversational assistant that lets users explore FMBench in natural language
- Designed a modular RAG pipeline with LangGraph, FAISS, and Amazon Bedrock for embeddings and generation
- Deployed a FastAPI backend on AWS Lambda with API Gateway and a Streamlit frontend for real-time chat

Topics and Sentiments in Reddit Data

Aug 2023 – Dec 2024

- Analyzed 1B+ Reddit posts and comments over 14 months with NLP and ML to surface state-level trends
- Processed 109 GB with Spark on AWS SageMaker, cutting data volume 95% for faster large-scale analysis

EDUCATION

Georgetown University

Washington, D.C.

M.S. in Data Science & Analytics

Aug 2023 – May 2025

Grand Valley State University

Grand Rapids, MI

B.S. in Computer Science

Aug 2015 – May 2020

SKILLS

Programming: Python, SQL, R, Java, C++

Machine Learning: Scikit-learn, TensorFlow, PyTorch, XGBoost

Data Visualization: Tableau, Plotly, Seaborn

Big Data & Cloud: Apache Spark, Databricks, AWS SageMaker

NLP: spaCy, Hugging Face Transformers, BERT

Databases: MySQL, PostgreSQL, MongoDB, Snowflake

Tools: Docker, Flask, Quarto, CI/CD pipelines

Statistical Methods: A/B Testing, Regression, Bayesian Analysis
